

EDUCATION

Deenbandhu Chhotu Ram University Of Science And Technology BTech - Computer Science.	Murthal, Sonipat(Haryana) 2020-2024
Vidya Mandir Public School 12 th Class, Non-Medical ; Percentage: 83%	Faridabad, Haryana 2019

SKILLS SUMMARY

- **Languages:** C, C++, HTML, CSS, JavaScript, Typescript, SQL
- **Lib/Frameworks:** React.js, Redux, Next.JS, Jest, ExpressJS, Tailwind CSS, Zustand, Remix
- **Databases:** Firebase, MongoDB, PostgreSQL
- **Tools:** Visual Studio Code, Git, GitHub, Github Actions (CI/CD), Postman, MongoDB Compass
- **Soft Skills:** Time Management, Problem-Solving, Highly Adaptable, Creative, Excellent communication
- **Cloud Platforms :** Amazon Web Services (EC2, S3, CloudFront)

EXPERIENCE

Full Stack Web Developer (Triangle Syscom Pvt Ltd.)	July 2024 – Present Dwarka, Delhi
• Hozo Homes - Developed an end-to-end responsive Website for Hozo Homes, a property rental platform in Gurugram, using React.js and Redux for efficient state management. The tenant website allows users to search, view, and rent properties, while the landlord website manages property listings and accounts. The backend is deployed on AWS EC2, with S3 for file storage and CloudFront for frontend distribution.Implemented secure authentication with email/password and Google sign-in, and developed an admin panel for site management, user control, and query resolution. Integrated CI/CD with GitHub Actions for seamless deployment. • DesynWorks - It is a MERN stack project that generates interior design images and 3D models (.glb). It works by using Google Gemini API to create a detailed text prompt based on user input. This prompt is then sent to Runway AI, which generates realistic interior images from it. The platform seamlessly integrates AI-powered design suggestions with 3D model creation, offering users an innovative visualization tool for interior spaces.	

PROJECTS

Nerdy Social - A Social Media App LINK ○ Developed a responsive social media app with React, Redux, and Tailwind CSS, featuring user accounts, posts, and comments, integrated with Firebase for authentication, real-time Firestore data, and cloud services. ○ Designed intuitive, user-friendly interfaces with HTML, CSS, and TailwindCSS, enhancing interactivity with JavaScript while efficiently managing state using React.js and Redux. Firebase was used to handle authentication and cloud-based data storage for scalable, secure operations.
Taste Rush - Food Ordering App LINK ○ Developed a feature-rich frontend application using HTML, CSS, JavaScript, React, and Tailwind CSS, with dynamic interfaces and streamlined styling. Implemented efficient state management with Redux to ensure seamless data flow and smooth user interactions. ○ Enhanced user experience with shimmer UI effects for engaging loading visuals, and ensured robust code quality through comprehensive unit and integration testing with Jest, ensuring reliability and stability across all features.

ACHIEVEMENTS

- Solved 500+ questions on data structures & algorithm across various platforms including Leetcode, Codeforces etc.
